

ABSTRACT OF THE DISCLOSURE

A group wagering game is provided in which all entrants win or lose simultaneously as a group. The method of playing the game includes forming a group consisting of all entrants who have made a first wager on a first game and a second wager on the outcome of second group game. The outcome of the second group game is determined first, but is only applied if the first game is a winner. As such, a "bonus" round of play is provided which generates group interest and excitement in the gaming experience.
